

CAPSTONE PROJECT WORK

MCA-IV PROJECT DOCUMENTATION FORMAT

The project documentation may be about 60 to 80 pages (excluding coding). The project documentation details should not be too generic in nature. Appropriate project report documentation should be done, like, how you have done the analysis, design, coding, use of testing techniques/strategies, etc., in respect to your project. To be more specific, whatever the theory in respect of these topics is available in the reference books should be avoided as far as possible. The project documentation should be in respect to your project only. The project documentation should include the topics given below. Every component shown below carries certain weight age in the project report evaluation.
